DATES TO REMEMBER - Leaf & Limb Pickup:
September 5th and 19th

NOTICE

As part of the City of Manly sanitary sewer system evaluation program, City crews with the assistance of WHKS & Co. will conduct city-wide smoke testing throughout the City for several days (between September 10th . 21st), weather dependent. The purpose of the smoke testing is to identify areas where clear water may be leaking into the sanitary sewer system.

This process involves forcing non-toxic smoke into the sewer pipes with a mechanical blower and observing the areas from which the smoke appears. While the blower is running, crews will travel quickly throughout the area taking photographs of problem areas. The smoke is non-toxic, leaves no residue, and creates no fire hazard. The white smoke may appear from vent pipes on the roofs of buildings, and from defects in the sewer lines.

The smoke may enter your home or building if a drain trap is dry or if the building has defective plumbing. Residents should pour approximately a gallon of water into each drain to make sure that the trap is full. A drain that has regular use should already be full. If you have any questions, please contact Jordan McLaughlin at (641) 430-1281.

If smoke does enter a building, please report all locations to the work crews by calling City Hall at (641) 454-3090.

**CITY HALL WILL BE CLOSED ON MONDAY,
SEPTEMBER 3rd FOR LABOR DAY.**

**106 S. Broadway, PO Box 516 – Manly IA 50456
641-454-3090**
